

Build a Feedback Culture YOU Desire

The Concept

Employee Outlook is an independent platform for all professionals, promoting the exchange of honest & objective feedback & its use for personal branding. The platform is authentic and helps individuals to grow professionally on a large scale.

Discover. Unlearn. Learn. Grow

Client's Vision

Giving wings to the client's ideas.

The client had a really clear vision of shifting to a healthy feedback culture by enabling all working individuals to freely voice their opinions, thereby creating equity in the professional workspace for all.

How Softuvo Helped In Achieving Client Goals?

We welcome our client's thoughts and provide them with the best solutions only. We believe in a full-proof plan and focus on creating one for our clients. Here is how Softuvo carried the journey of Employee Outlook.

Planning and Strategizing

At Softuvo, we work in a very strategic manner and at no point, we take risks with the client's work. For Employee Outlook, we created an action plan that focused on covering all aspects of the client's requirements. By taking up regular scrum meetings, we made sure no stone left unturned.

Design

The client wanted a simple and easy-to-use interface that enhances the user experience. The website is all about sharing and receiving reviews so by keeping the idea in mind, we created designs that not only enhance the visual outlook of the site but also enhances the overall user experience.

Development

The development process involved a combination of high technologies and frameworks. We used Angular at the frontend and incorporated the Spring boot framework at the backend. By using the right blend of technologies and the right development techniques, we successfully delivered the project surpassing the client's expectations.

Deployment and Testing

Once the development code was ready, the team went ahead with the deployment phase where everything was pushed to live to seek final results. The testing part involved the use of high-tech testing tools that helped us check all the functionalities of the website and web app. After a thorough testing procedure, we successfully delivered the project with flying colors.

Key Challenges We Faced

No project comes free of challenges! There were a few hurdles in our journey with Employee Outlook as well.

Time Zone

Employee Outlook is a US-based project, so there was a time zone difference. Although there was always clear and seamless communication with the team there, there were also sometimes when we had to wait for replies due to the different time zones. But, the team overcame the challenge and did its best in the project.

Making the website SEO-friendly

The client wanted the website to be SEO-friendly and to achieve his vision, we had to create an SEO-friendly website. We had to integrate Angular SSR to achieve the website's efficiency. With the right functionality, our team finally made the website SEO-friendly.

The Result

Saying goodbye to all the hurdles, we delivered the project by surpassing the client's expectations.

Employee Outlook inspires a shift to a healthy feedback culture at all levels of professional functioning, with the ultimate goal of promoting a fulfilling work experience. Our high-tech solution helped the client achieve his business vision in the right way.
